PROFILE SUMMARY

MCA student (VESIT) targeting a Customer Solutions internship, with a track record of turning technical concepts into shipped solutions: built and pitched SAVAR, an IoT crash-detection system, to win two national-level startup competitions. Combines technical depth, structured problem-solving, and stakeholder communication as an active student leader – wired to understand technical requirements, communicate solutions clearly, and drive successful implementation.

EDUCATION

Vivekanand Education Society's Institute of Technology (VESIT). 2025 – 2027

Master of Computer Applications (MCA) — SGPA: 9.54, 9.88

Tuljaram Chaturchand College, Baramati. 2022 – 2025

Bachelor of Computer Applications (BCA) – SGPA: 9.86, Top 10% of class

Presented research papers on Prompt Engineering and Emerging Fin-tech in India

LEADERSHIP & ACHIEVEMENTS

Placement Coordinator, MCA Department. 2025 –

Present

Vivekanand Education Society's Institute of Technology

- Liaise between the placement cell, recruiters, and students – coordinating drives and scheduling for the MCA batch; a stakeholder-management skill directly transferable to customer onboarding and technical account management.

SAVAR – National Startup Pitch Recognition.

2025

Startup Pitch Competitions

- 1st Prize – All India MCA Meet, NIT Tiruchirappalli
- 3rd Prize – E-Summit, BVCOEL Pune

PROJECTS

SAVAR – IoT-Based Two-Wheeler Crash Detection System. Jan 2025 –

Present

- Owned the solution end-to-end: identified the safety gap, scoped requirements, and built a working prototype (ESP32, MPU-6050 motion sensing, MAX30102 heart-rate monitoring, BLE architecture).
- Iterated the concept from a pitch competition (team Bikesafe, VESIT) into an IEEE-format research paper presented at NIT Tiruchirappalli, then into a two-time national pitch-competition winner. Stack: Android (Java, XML), ESP32, MPU-6050, MAX30102, Firebase, BLE.

Aria – AI Voice Assistant for Medical Reception.

2025

- Implemented a voice-based AI receptionist for a live oncology center to handle patient calls end-to-end, reducing manual front-desk load; integrated Twilio, Sarvam AI (Indian-language STT/TTS), Gemini 1.5 Flash, and MongoDB.

PeerPulse – Note-Sharing Web Platform. Jul 2024

- Built a web app for students to create and join “Circles” to share notes and resources, with an AI chat assistant via the Google Gemini API. Stack: HTML, CSS, JS, Bootstrap, Java, Servlets, JSP, JDBC, MySQL.

EXPERIENCE

Innomatics Research Labs, Pune. Jun – Jul

2025

Junior Data Scientist Intern

- Cleaned and analyzed real-world datasets end-to-end – from exploratory analysis through model building – turning raw data into insights that shaped stakeholder decisions, and iterated on solutions based on mentor feedback.

Aspire Technologies.

Jun – Sep

2024

Java Full Stack Intern

- Partnered directly with design and engineering across multiple feature releases, turning concepts into user flows, wireframes, and clickable prototypes that shaped the final product experience.

Tripathi Classes.

Jun – Dec

2024

Operations & Administration

- Owned end-to-end operations for a JEE/NEET coaching institute – managing student records, faculty schedules, and budgets – and built tracking spreadsheets that surfaced and drove process improvements.

SKILLS

Technical: Java, JavaScript, HTML/CSS, XML, SQL/NoSQL, APIs, Firebase, Spring Boot, Git/GitHub

Product & Analytical: Problem framing, user research, prioritization, pitch storytelling, data analysis, spreadsheets/dashboards

Tools: Excel, Google Gemini API, Twilio, MongoDB

Languages: English, Hindi (Proficient), Marathi (Native)
